

Job Summary: Industrial Designer

Location: PTI Engineered Plastics

Job Type: Full Time

Shift: Days

Experience: 2-5 Years

Education- Level Degree in Industrial Design

Salary: Salary and benefits will be commensurate with experience. Competitive wages, excellent benefits.

Job Purpose: Lead our clients' concepts from sketch to production through ideation, design, engineering, prototyping and manufacturing; creating innovative products for the real world

Collaborate with other cross-functional teams including engineers, project managers, and clients as well as other designers to produce solutions that meet and exceed client and company expectations.

Duties: Develop design solutions through conceptual sketching, group brainstorming, mock ups, and 3D modeling

Work with marketing, engineering, quality, and manufacturing teams to ensure that design details are carried through into production

Be self sufficient and manage multiple fast paced workloads

Skills and Experience:

- Excellent visual communication and form development skills demonstrated in your sketching and modeling
- Impressive graphic design samples
- Extensive 3D CAD modeling & rendering experience (SolidWorks preferred)
- Excellent verbal communication and presentation skills
- Ability to work smoothly with a fast-paced interdisciplinary team
- Degree in Industrial Design and 2-5 years of professional experience
- Plastics experience a plus
- Medical device experience a plus

Applicants must have work samples to be considered (Please limit your file size to under 8MB)

Software Skills:

- 3D Modeling (SolidWorks) and Rendering (KeyShot)
- 2D (Sketchbook Pro, Photoshop, Illustrator, InDesign, PowerPoint)
